

BB7 Training - Implementing Fire Risk Management Systems

Course title:	Implementing Fire Risk Management Systems		
Location:	The Breeze Kelvin Close Birchwood Warrington WA3 7PB		
Cost:	£140 plus Vat		
Duration:	1 Day	Date:	19 th November 2015

This course has 5 hours of CPD credit awarded from the **Institute of Fire Safety Managers (IFSM)**

Aims

This interactive training day is designed to help delegates understand the requirements of a structured fire risk management system. Thus enabling delegates to develop a bespoke FRM system; utilising a model which offers a structure but allows flexibility to fit in to all organisations.

By the end of this course, participants will be able to:

- recognise the importance of the Fire Safety Policy Statement, as the “keystone” of the FRMS and of an indicator of management commitment to:
 - legislative compliance
 - managing the risk of fire
 - continual performance improvement
- understand how the policy should be based upon fire risks identified by the organisation and its influence on the system controls
- determine how the requirements of a fire risk management specification are implemented and integrated into the everyday operational controls of the organisation.

Specific Aims:

Learning

- Appreciating the principles of fire risk management
- Recognising how an effective management system is developed and managed for improvement
- Setting realistic objectives and targets and how to monitor them
- Responding to system indicators to improve performance

Outputs

- To be able to recognise how, where and when to commence development of a FRMS
- To identify key roles and responsibilities for your own FRMS

Have you formalised your fire risk management system or are your systems haphazard and somewhat inconsistent throughout your organisation?

Most non-domestic multi-fatality fires have management failings as their root cause.

Fire risk is often governed more by the quality of management than the level of fire protection.

A building with first rate fire precautions yet poor management, may pose a greater risk than a building with limited fire precautions and good management.

Management must be considered as of equal importance to fire protection measures.

Outline of the day

10.00	Course Registration
10.15	Course outline - Delegate introduction, objectives and administration.
Session 1:	Why implement a fire risk management system
Session 2:	Setting specific objectives
Session 3:	Writing a FRM policy to reflect objectives
Session 4:	Underpinning strategy
12.45 - 13.30	Lunch
Session 5:	Procedures
Session 6:	Risk assessment
Session 7:	Review and audit
Session 8:	Continual improvement
16.05	End of Day

There will be short breaks mid-morning and mid-afternoon.

How to book

email bernadette@bbseven.com or for further information contact Simon Ince on **07535 267363**.

BB7

We are a specialist firm of consulting engineers, operating in the risk and resilience niches of fire, security and continuity. We were the pioneers of strategic fire risk management and are the principle authors of **PAS 7: 2013 – Fire Risk Management Systems Specification** and have therefore acquired an unrivalled insight into the implementation of organisational risk management systems.

Tutors

Tom Gilbert - is the head of fire risk management at BB7 and has extensive experience of implementing fire risk management in the social housing sector.

Simon Ince - is head of business resilience and has in-depth knowledge of audit methodology and quality assurance systems.

Clive Webster - is our senior fire consultant and has vast experience of working in fire safety as an enforcer and across the diverse Crown estates.
