

£11.7 billion is needed to build 75,000 zero carbon homes by 2036.

For every £1 Welsh Government spends on building a house, housing associations will match it.

Building the 75,000 zero carbon homes by 2036 would...

...generate 50,000 jobs across Wales.

...create 19,500 training and apprenticeship opportunities.

...allow housing associations in Wales to employ and support 16,000 staff.
